WeatherX™ is an ideal paint coating for roll-formed residential and commercial products such as roof and wall panels. Citadel Metal Supply, LLC offers WeatherX in a variety of standard colors shown on this card. Many of these colors are formulated to meet ENERGY STAR® guidelines for steep slope roofs, which mean they can decrease the amount of money you spend on energy to cool the building. An asterisk next to the color name denotes these colors. Citadel Metal Supply, LLC also offers USDA compliant white for applications where incidental contact with food occurs. Custom colors are also available.

WeatherX coatings are recognized for their color durability and gloss retention. WeatherX technology combines durable ceramic and other select inorganic pigments with the strength of Valspar's proprietary silicone polyester resin to fight the detrimental effects of the sun's ultraviolet rays, rain, humidity, and weathering. WeatherX also provides superior abrasion resistance that allows this product to endure the physical abuse of fabrication, transit, and construction minimizing cracking and marring.

Note: Colors shown represent the products offered, but will vary from the finished product. Colors subject to change without notice.
